

COOLFONT MOUNTAINSIDE

BERKELEY SPRINGS, WEST VIRGINIA

Twelve years after this mountainside resort closed, new owners are re-establishing this West Virginia destination. Soon to offer over 35 cabins, a restaurant and more to visitors, this location needed a septic system that could easily carry the load for years to come.

Tanks Direct recently supplied a ZCL | Xerxes 12' diameter, 48,000-gallon single-wall wastewater fiberglass tank at a West Virginia resort. This tank setup replaced an outdated septic system and will serve this resort for many years to come while protecting the mountain environment and community.
